How to Measure

Arms

Measure the distance from the middle of the back of your neck, over the top of the shoulder, along the outside of your arm, over the elbow to the prominent wrist bone, taken with the arm bent 90 degrees and the hand placed on the hip.

Chest

Place a tape measure under your arms and measure around the fullest part of your chest.

Natural Waist

Measure around your natural waist at the narrowest point.

Hips

Measure around the fullest part of your hips.

Body Inseam/ Inside Leg

Measure from the top of your inner thigh along your leg to the bottom of your ankle. If you like your trousers long, measure down the lower part of your foot.

Garment Inseam

Using a pair of pants that fit well, measure from the crotch seam to the bottom of the leg. For outerwear pants we recommend that cuffs do not pool in the front to stay clear of binding buckles and connection points.
